**EMMANUELL SYMLAR**

**New Port Richey, FL (Open to Remote) | (813) 808-0822 | emmanuellsym@gmail.com LinkedIn:** linkedin.com/in/emmanuellsymlar | **Portfolio:** esymlar.github.io **Work Eligibility:** U.S. Citizen | Eligible for U.S. Public Trust Clearance

## PROFESSIONAL SUMMARY

Senior Cloud & Infrastructure Engineer with 6+ years of progressive experience supporting, administering, and automating complex cloud and hybrid environments, Windows & Linux servers, enterprise networking, and disaster recovery. Proven Tier III escalation point experienced in ITIL-aligned incident and change management, root-cause analysis (RCA), and SLA adherence across federal and enterprise environments (Deloitte GPS). Adept at multi-cloud governance (AWS & Azure), Infrastructure as Code (Terraform, Bicep), PowerShell/Python automation, CI/CD pipelines, and authoring technical runbooks and SOPs. U.S. Army veteran bringing rigorous security discipline, structured execution, and a collaborative, client-focused mindset.

## CORE COMPETENCIES & TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, VPC, S3, Route 53, IAM, ELB, CloudWatch, CloudTrail, Systems Manager, AWS Backup), Microsoft Azure, Azure AD (Entra ID), Microsoft 365 (M365), Multi-Account Governance
- **Infrastructure & Virtualization:** Windows Server, Active Directory (GPO, Identity Management), Red Hat Enterprise Linux (RHEL), Oracle-Hosted Workloads, Hybrid Cloud, Hyper-V, VMware, OS Patching & Lifecycle Management
- **Networking & Connectivity:** TCP/IP, Policy-Based Routing, Load Balancing, Firewalls, VPNs, DNS/DHCP, VPCs, VNets, Network Security Groups (NSGs), Hybrid Connectivity
- **Automation & IaC:** Terraform, Azure Bicep, ARM Templates, PowerShell, Python, Bash, AWS CLI, CI/CD Pipelines, GitHub Actions, Azure DevOps, Version Control
- **Identity, Security & Compliance:** IAM, RBAC, MFA, Principle of Least Privilege, Permission Boundaries, SCP Guardrails, STIG Compliance, NIST-800/FedRAMP Alignment, Audit Readiness, Patch Management
- **Operations & Governance:** Tier III Escalation Support, ITIL Best Practices, Incident & Problem Management, Change Management, Root-Cause Analysis (RCA), Disaster Recovery (DR) & Backup Planning/Testing, Monitoring & Alerting, Standard Operating Procedures (SOPs), Client Runbooks

## PROFESSIONAL EXPERIENCE

**Solutions Analyst (Cloud & Infrastructure Engineer) | Deloitte (Government & Public Services)** *June 2022 – April 2026 | Remote / Tampa, FL*

- **Tier III Incident & Escalation Management:** Served as a senior escalation point for complex production issues across compute, networking, storage, identity, and security, driving cross-stack root-cause analysis (RCA) and preventative remediation within strict SLAs.
- **Cloud Infrastructure & Telemetry:** Supported, administered, and troubleshot large-scale AWS production environments (EC2, VPC, S3, Route 53, IAM, ELB, Systems Manager, AWS Backup) alongside hybrid Azure integrations, configuring proactive monitoring and alerting via CloudWatch, CloudTrail, VPC Flow Logs, and OS/application telemetry.

- **Windows & Linux Server Administration:** Administered Windows Server and Active Directory environments (GPOs, DNS/DHCP, identity troubleshooting, patching, server lifecycle management) and supported RHEL-based workloads (OS upgrades, secure configuration, service troubleshooting, application hosting).
- **Infrastructure as Code & Automation:** Built and maintained modular Terraform IaC templates for provisioning cloud compute, networking, IAM, and security resources; engineered automation scripts using PowerShell, Python, Bash, AWS CLI, and CI/CD pipelines to eliminate repetitive operational tasks.
- **Backup, Disaster Recovery & Compliance:** Executed backup operations, disaster recovery (DR) planning, failover testing, and resiliency initiatives while enforcing STIG compliance, least-privilege IAM, and audit readiness across federal workloads.
- **Documentation & Cross-Team Collaboration:** Triaged developer environment issues, resolved REST/API failures, authored system architecture diagrams, SOPs, and troubleshooting runbooks, and collaborated with engineering teams, vendors, and stakeholders to deliver infrastructure improvements.

**Infrastructure Support Technician | Full Sail University** *April 2019 – October 2021 | Winter Park, FL*

- **Systems & Network Administration:** Supported Windows Server, Active Directory, DNS/DHCP, virtualization, storage, endpoint security, and hybrid cloud-integrated systems across distributed campus environments.
- **Operations & Maintenance:** Executed routine server patching, system health monitoring, backup verification, and escalated technical troubleshooting.
- **Documentation & Client Support:** Maintained technical documentation, service request/incident ticketing workflows, and clear user-facing communication.

**Intelligence Analyst | U.S. Army** *2017 – 2018*

- **Secure Systems & Compliance:** Executed structured intelligence analysis, secure information handling, and mission-critical system operations under rigorous federal security and compliance protocols.
- **Risk Mitigation & Execution:** Applied disciplined analytical frameworks and strict procedural adherence to safeguard sensitive operational data in high-stakes environments.

**EDUCATION & CERTIFICATIONS**

- **Bachelor of Science (B.S.) in Cloud Technologies** — Full Sail University | *Salutatorian* (October 2021)
- **In Progress:** Microsoft Certified: Azure Administrator Associate (AZ-104)

**ADDITIONAL INFORMATION**

- **Languages:** Fluent in English and Spanish (Native)
- **Portfolio & Code:** Active cloud architecture, Terraform/Bicep IaC, and hybrid identity labs documented at **esymlar.github.io**
